DETAILED ACTION

Election/Restrictions

1. Claims 9-15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in oral election/restriction dated 5/18/05 (see the previous office action dated 5/27/05).

Response to Arguments

2. Applicant's arguments with respect to claims 1-8 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Yoshizawa et al (JP-404362397).

Yoshizawa et al teach a composition comprises diamond grain cluster of less than 100 angstroms (<10 nm) in average size, reads on the claimed particles diameters

in the range of 1-10 nm and the diamond particles are dispersed in water-based aqueous solution (see the abstract).

The intended use of the composition used as a polishing slurry for texturing a surface of a magnetic hard disk is not given patentable weight and even given the patentable weight, Yoshizawa et al's composition is exactly same as the instant invention and the composition is capable of texturing the disk as a polishing slurry.

5. Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Brown et al (6,544,599).

The preamble limitation of "polishing slurry for texturing a surface of a magnetic hard disk substrate" is not given patentable weight because a preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

Brown et al disclose a process of seeding using a composition including cluster diamond particles with sizes of less than 1 μm , for example 4 nm (col.9, lines 65-col.10, lines 3, col.10, lines 14-30 and col.15, lines 31-38, col.16, lines 8-12).

Brown et al teach that the composition also includes liquid such as water within the claimed proportions (col.10, lines 35-48).

Brown et al also teach surfactants may optionally used in the composition, wherein the surfactant can be added about less than 10 weight percent (col.10, lines 49-59).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. JP-5-156239 teaches a slurry comprises cluster of diamond particles in water (see abstract).

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
